Activities

A little over 80 years ago, a small group of people were passionate about bringing electricity to the people and farms of our rural communities and worked to form the Osage Valley Electric Cooperative.

Help us get to know you. What are you passionate about? Please include, on a separate sheet of paper, a page or more that tells us about you, what you are passionate about and why. Responses must be typed and limited to two pages. Tell us what makes you unique! Applications will be judged on composition, independent thought, neatness and grammar.
